Quality of celery is reported good for fall, and the crop is expected to show these and increasing shipments after the 17th.

Corn shipments picked up to the point that supplies on Monday were heavy, with 48 car-

lots of yellow and five cars of white. Prices were around \$1.75 for yellow and \$2.00 for white.

Liberal supplies of leaf crops but a slow demand were evident.

Due to showery weather beans showed movement, with an increasing supply. Processors - freezing and canning - took most of the beans sold, and at a price of \$2.00 to \$2.50. Supply will increase with weather permitting.

No Increase In Rates For New Or Old  
City-wide Sewerage Extension Plan

Plans by the engineers, studied by financial advisors, and projections of a plan for city-wide extension of the sewerage system which include improvements for economy of operation, do not so far indicate the need for raising either the present rates for old users or the higher rate for new additions, according to information obtained thru the City Hall.

The present sewerage system it is understood, is operating at a loss, and projections indicate that additional customers will allow operation more efficient.

Some alterations, indicated through use of the present system will reduce particular costs also.

Under the proposed plan ALL within the City limits will be served, and the addition of other areas in a rim around the city will be able to be served. Recent activity of out-of-town builders who want to offer original installation was an attempt to care for the most needed relief, and now that financing may be aided by activity in sugar and cattle, the plan provide for orderly expansion as the community grows.

One citizen put it this way: "I'd like to see an extension built as soon as possible, to relieve the present house short-ages and I believe the plans provide for orderly expansion as the community grows."

It was conceded that the original installation was an attempt to care for the most needed relief, and now that financing may be aided by activity in sugar and cattle, the plan provide for orderly expansion as the community grows.

Talk with your City Commissioner, and let them know your feelings, as some decision must be made as soon as practicable.

Car Overtuns  
On Country Road

The Glades Are Being  
"Discovered" Now!

The potential sweetness of the area is enticing! The Wall Street Journal discovers kenaf as a potentially large land use - a large machinery and equipment manufacturer appears to be in the midst of a crash program to supply the expanding industry with equipment.

THE GLADES and SUGAR are synonymous in the big dailies and business weeklies of the country.

Expansion, in our case, brings foreign tongues, ideas and modes of living. We have the Mexican, the Puerto Rican, and Cuban, and the Bahamian and these from other areas of our country.

We have the top, the middle and the bottom of the social, cultural and economic levels in these parts of our country.

The adjustments are problems in the laps of our schools, our churches, our civic organizations, and our governmental units. Problems will disappear in proportion to the thought and effort of all.

1. 11 lb. 7 oz. Rose Mary Osborn, Miami, Shiner, North New River.  
2. 11 lb. 4 oz. Charles Metcalf, Hollywood, Shiner, L-7 Canal.  
3. 11 lb. 2 1/2 oz. Malcolm Cassemann, Miami, Dalton, Rinn Canal.

1. 12 lb. 12 oz. Annabelle White, Clewiston, Minnow, Lake Harbor.  
2. 12 lb. 11 oz. Bill Rhodes, Ft. Myers, Spook, Caloosatchee River.

First place in bass was taken by a Miss Rose Mary Osborn a tourist from Michigan who is staying in Miami. She was fishing along the North New River Canal with a shiner. This bass incidentally is the only one she caught for the whole day fishing. Second place winner in the bass was made by a Charles Metcalf of Hollywood while fishing a shiner in the L-7 Canal near the pumping station. He had five other bass besides this one with two others over five pounds.

Third place in the bass division was taken by Malcolm Cassemann while fishing the Rinn Canal between Lake Harbor and Eleventh. His catch was made on a Dalton Silver finish. Two other bass for four pounds were taken the same day this catch was made.

The bass entries came in the last week from many locations. The far away as Andytown, Moore Haven and Okeechobee. So you see the fishing interests are evenly balanced in all directions in this fabulous Everglades fishing grounds.

In the crappie or speck division we only had one entry which makes for a first place winner this month. Catch made on a live minnow. Catch was made by Annabelle White at Lake Harbor.

Same was entered in the first place winner. This catch was made on the Caloosatchee River near Lake Harbor. The catch was made on a Weedless Marathon Rattle Spoon by Bill Rhodes of Ft. Myers.

It looks like the initial month of the fishing contest went off with a bang 14 entries in bass and a fourth brother. Pierce of Rogers. Two sisters, Mrs. Mary Joe Foster, California and Mrs. Effie Mae Balach, Rogers. Williams-Wetherington. Funeral Home was in charge of arrangements.

Norman Jansik of Miami proved his fishing ability this week by bringing in seven bass, four of which ran from 6 1/2 lbs. to 8 1/2 pounds. But listen to this, Norman comes up with a new idea of using an outboard motor for an anchor: can you top this one... Ho Ho.

## Slims Fish Camp

Nan Corbin of Belle Glade brought home the specks this week with a catch of 27 while her husband just went along for the ride. With his luck he tells me he acted as her guide. That's the same story I use when my wife trims my ears.

Two parties from Ft. Lauderdale reported a combined catch of 145 specks.

Mr. Nutt and two school teachers of Belle Glade had five bass to 8 1/2 pounds with an 8 1/2 pound to round out the best catch.

## Okeechobee Elevation Forgets US Engineers

The U. S. Engineers, aided and abetted by bull headed mistakes serving as members of the Central and South Florida Flood Control District, have issued regulations that Lake Okeechobee must not attain an elevation of less than 12.56, and forced homeowners to abandon Florida soil — by analysis and climate — for mere token payments.

Now comes the Engineers with the following:

Information is furnished to all concerned that because of drought conditions in the central Florida area full project depth of 8 feet is not at present available in the Lake Okeechobee Section of the Okeechobee Waterway. Project depth is based on a minimum lake elevation of 12.56 feet above mean sea level and the elevation as of this date is 12.48 feet.

All navigation passing through the waterway should exercise caution and take the reduced depth into consideration until such time as the water level of Lake Okeechobee returns to normal.

It appears that Westpoint's scholastic and IQ "Darlings" self-inflicted political appointments as members of the Glades at the expense of the Glades oldest contributing pioneers.

Floridians concerned with the white background of the white who find it wither to visit Cypress Gardens where they wind displays of handsome of native and exotic plants.

Florida's 1962 automobile tags will have a white background with blue numbers for private cars. Official cars will have a yellow background and black numbers. All will carry the slogan "Sunshine State."

## CUBAN CORNER

Noticias de La Cubaneros

In the second appearance of this column in the Belle Glade Herald, we, the Cuban people living in this beautiful community, wish to express our most sincere thanks to the farm has planted given us.

We hope that during our exile here we may be of some valuable help in the expansion of this city, either with our technical knowledge or with our sincere desire to be useful to the people of the United States who do not hesitate to open their doors during the time our country is oppressed by the evils of communism.

We wish also to invite the other Cubans to join us in assisting this English class, which meets every Wednesday evening in Room 4, High School Building.

Last week, we introduced several members of this class. We should like to introduce more this week.

Mrs. Herminia Garcia lives in Ft. Pierce, with her son, Eloya. She states: "I came from Havana, Cuba. Lo ahora mi diversión es aprender ingles."

Mr. and Mrs. Enrique D'Abregon are from Sagua la Grande, Cuba. Mr. D'Abregon is employed at Ocala Farms Sugar Mills. But now she thinks she will be able to go to the beach, which she deems is a beautiful place and good for living.

Mrs. Acelsa Duker says that when she came from Cuba, just two months ago, she did not think she could learn to speak English, but now she thinks she will be able to. She likes Belle Glade. She is glad to have other

## It's Interesting Speculation

The future of opinions concerning "Why Kallenberger was fired" brings some interesting speculation that only Governor Bryant can answer.

It was fired because of his indictment by the Grand Jury, fairness to those who elected him dictates that he be reinstated, because a jury wouldn't convict him.

If other reasons may be substantiated as the basis, then it's the Governor's "baby."

The Florida Senate will finally decide whether to make it permanent or not, if he's denied reinstatement.

The Governor might observe protocol by reinstating him because of lack of petit jury conviction with a date of 1:00 p. m. and with the other hand remove him for "cause" with an order dated 1:05 p. m.
